ETHICAL DILEMMAS IN SOFTWARE ENGINEERING: A CASE STUDY - 01

Navigating Ethical Challenges with the ACM/IEEE/CS
Principles

Ethical Dilemmas in SE: A Case Study - 01

❖ **Navigating Ethical Challenges with the ACM/IEEE/CS Principles:**

- Introduction: Ethical challenges faced by a software engineer named Alex in the development of a social networking platform.
- Applying the ACM/IEEE/CS Software Engineering Code of Ethics and Professional Practice.

Case Study – Example 01

❖ The Scenario:

- Alex, a software engineer, works on a social networking platform. They discover the platform's algorithm might promote extremist content.
- Facing pressure from leadership and ethical dilemmas across the development process.
- **Principle 1: Public**
- **Challenge:** Algorithm promotes extremist content.
- **Action:** Report and insist on modifying the algorithm.

Case Study – Example 01

❖ **Principle 2: Client and Employer:**

- **Challenge:** Pressure to launch despite flaws.
- **Action:** Communicate risks and suggest phased launch.

❖ **Principle 3: Product:**

- **Challenge:** Misleading marketing claims.
- **Action:** Advocate for transparency in marketing.

❖ **Principle 4: Judgment:**

- **Challenge:** Quick but unethical solutions.
- **Action:** Reject and explore ethical solutions.

Case Study – Example 01

❖ **Principle 5: Management:**

- **Challenge:** Minimized testing to speed launch.
- **Action:** Stress importance of testing and quality assurance.

❖ **Principle 6: Profession:**

- **Challenge:** Use of proprietary code from a competitor.
- **Action:** Discuss ethical practices and consequences.

❖ **Principle 7: Colleagues:**

- **Challenge:** New team member struggling.
- **Action:** Offer mentorship and support.

Case Study – Example 01

❖ Principle 8: Self:

- **Challenge:** Stress and burnout.
- **Action:** Discuss workload and seek support.

❖ Conclusion:

- By adhering to the ACM/IEEE/CS principles, Alex can address ethical challenges in software development, ensuring integrity, transparency, and a commitment to the public good.

ENGINEERING ETHICS IMPLEMENTATION IN A UAE-BASED SOFTWARE HOUSE – CASE STUDY 02

A case study on TechSolutions

Engineering Ethics Implementation

❖ **Background:**

- TechSolutions, a leading software development company in the United Arab Emirates (UAE), specializes in providing IT solutions globally.
- Focus on quality, innovation, and ethical practices, it prioritizes employee safety, transparent communication, and fair workload distribution. It is committed to ethical decision-making, professional development, and environmental sustainability, ensuring compliance with relevant laws and regulations.

Ethical Codes Implemented

- Prioritize Human Safety and Well-being
- Transparent Communication
- Fair Workload Distribution
- Respect for Privacy
- Ethical Decision-Making
- Professional Development
- Environmental Responsibility
- Compliance with Laws and Regulations

Scenario

- Mr. Ali, a software engineer, faced a critical project with tight deadlines, working under project manager Ms. Maria.
- Challenges in managing project timelines and unclear communication led to increased stress and workload for Mr. Ali.

Incident

- Due to intense workload and stress, Mr. Ali experienced severe health issues, resulting in a hospitalization due to a brain hemorrhage.
- This raised concerns about work-related stress and employee health at TechSolutions.

Ethical Analysis

- The incident with Mr. Ali highlighted the need for prioritizing employee health, improving communication.
- And ethical responsibility to prevent work-related stress.

Resolution and Lessons Learned

- TechSolutions implemented health and wellness programs, communication training, workload assessments,
- And reviewed ethical guidelines to prevent future incidents.

Conclusion

- The case of Mr. Ali emphasizes the importance of adhering to engineering ethics.
- Addressing work-related stress and ensuring employee health and well-being.
