BUKC – Spring 2026

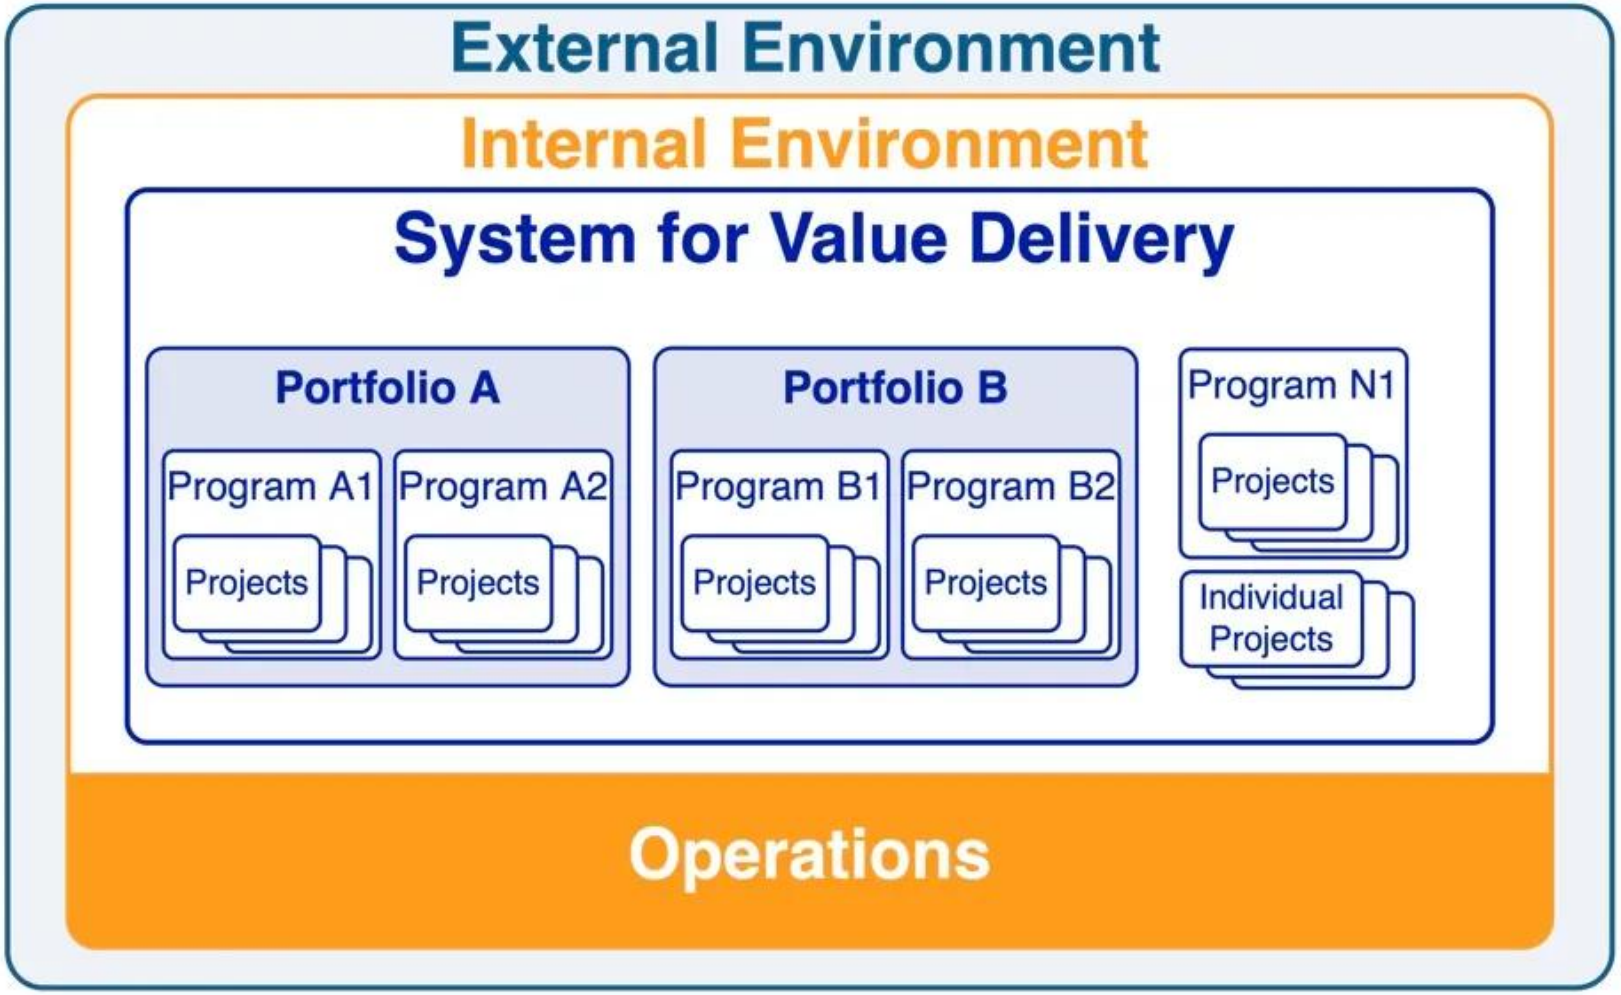

BBA [4] – 5 (A)

Project Management

Lecture # 2

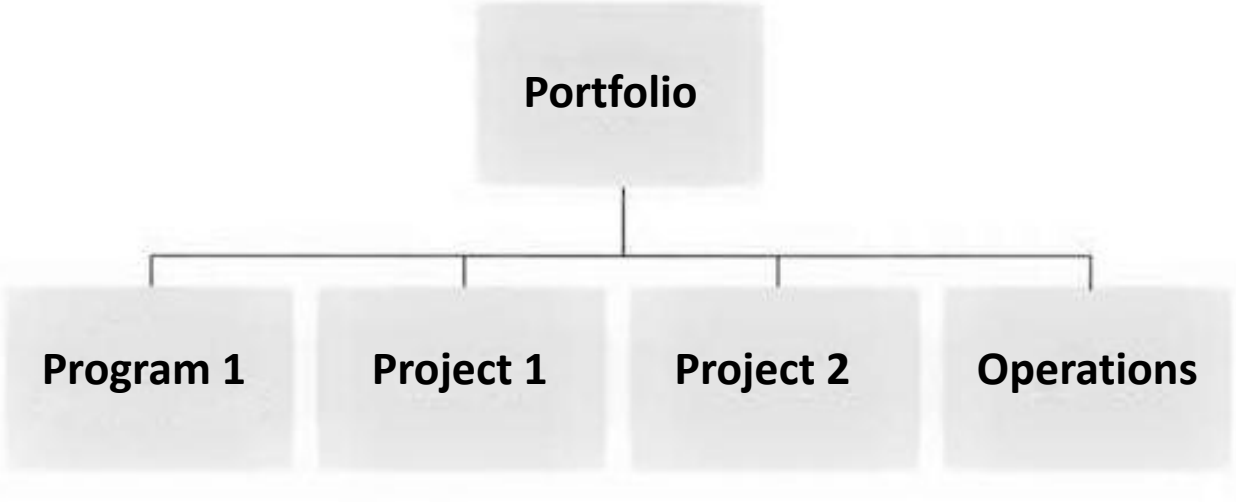

Components of Project Management Environment

P3 Management

- **Portfolio Management**

  Focuses on the highest level of strategic decision-making, **grouping related programs and projects,** to achieve overarching business objectives

P3 Management

- **Program Management**

  Manages a **group of inter-related projects** or **related activities** to optimally utilize resources, deliver benefits and reduces risks

P3 Management

- **Project Management**

  Deals with the planning, execution and completion of **individual projects** within a program or a portfolio supporting its objectives and ultimately achieving organization's strategic goals

Goal of the Project Management

- Effective portfolio, program & project management ensures that the organization is **focused** on its **vision** and **mission achievement**
- The **right** and **important work** are to be done **correctly at the right time** and in the **most cost effective manner**, to **gain more programs and projects** to its bucket

Value of a Project

Strategic Objective

IMPACT

LONG TERM BENEFIT

OUTCOME

OUTPUTS

DELIVERABLE

ACTIVITIES

INPUTS

Project Manager - The Project's Steward

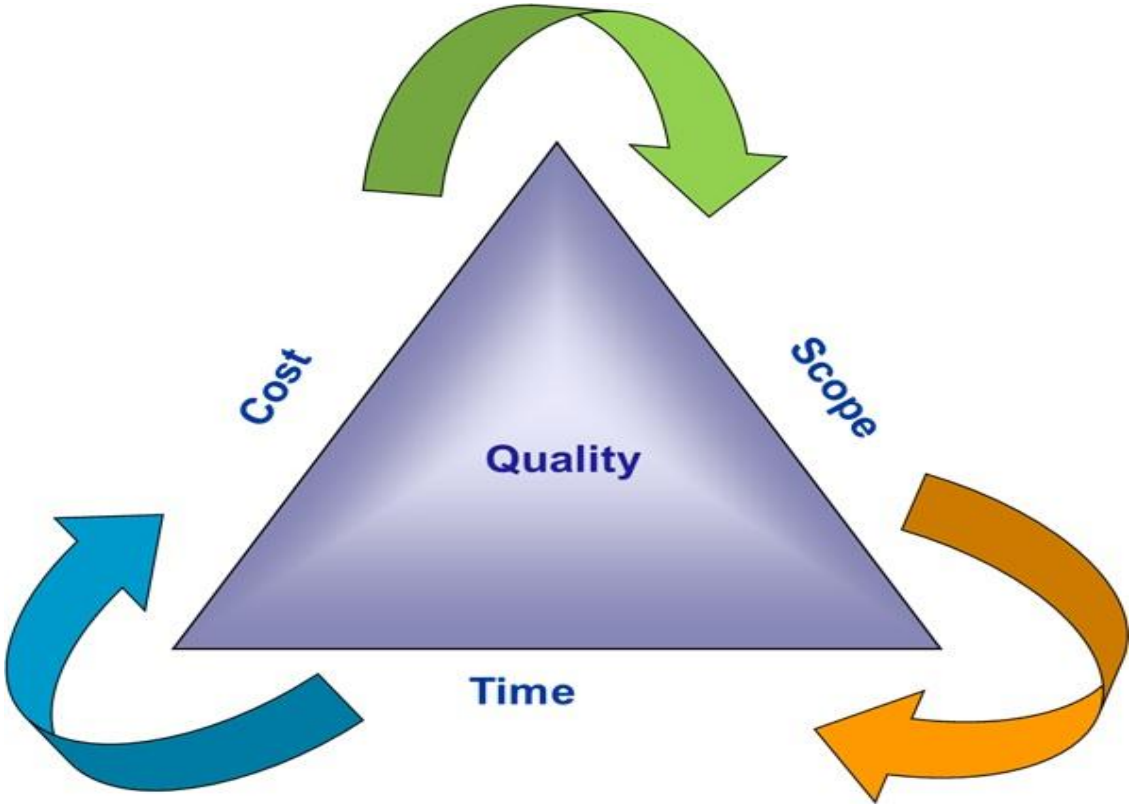

Responsible to attain the proj objectives in given timeline, as per the approved budget and resources to meet customer's requirements

Traits of a Project Manager

- **Determination** & **Performance** to **accomplish given objectives**
- **Knowledge** about Project, its background, objective, scope, constraints, assumption and risks
- **Awareness** of how to **manage** the project and has ability to be **resilient**
- **Capable** to **lead** & **manage** a **team** effectively
- **Ability** to **designate tasks** & have **soft skills** to undertake any challenging situation

Project Iron Triangle/ Triple Constraint

These constraints are inter-related!

It majorly depends on the **knowledge**, **ability**, **skills** and **authority** of the Project Manager to keep balance in these constraints

Responsibilities of a Project Manager

- Responsible to **plan**, **organize** and **manage** the project and the team
- Figure out **what**, **when** and **how** each resource will be employed in the project
- What **skills**, **roles and responsibilities** are required for project completion (Proj Office, collaborating partners, functional depts)
- Determine the **stakeholders** of the project, their **influence**, **interest, how** and **when** to meet their **expectations**
- **Empower** the team

Project Success Criteria

Successful projects meet;

- Planned Schedule
- Approved Budget
- Planned Scope
- Planned Quality
- Customer Satisfaction
- Alignment to Business

Mis-Managed Projects

- Missed Timelines
- Cost Overruns
- Uncontrolled expansion of project Scope
- Failure in achieving the Objectives
- Poor Quality
- Unsatisfied Sponsors/ Customers
